

Statera 6% Mn EDTA

KEEP OUT OF REACH OF CHILDREN

GENERAL INFORMATION

Statera 6% MANGANESE EDTA is a fully chelated solution designed for soil or foliar applications to prevent or correct manganese deficiencies in fruit, nut, vegetable and field crops. Foliar applications of Statera 6% MANGANESE EDTA may be particularly beneficial during periods of peak nutrient demand, for crops grown on soils having poor nutrient availability or crops suffering from a weakened root system.

FEATURES AND BENEFITS

- Highly effective under adverse soil conditions
- Water soluble and moves well in soil solution
- May be applied separately or in combination with many plant protection and other nutritional products
- Contains fully chelated EDTA manganese for enhanced micronutrient uptake

FUNCTION OF MANGANESE IN THE PLANT

Manganese assists the plant with nitrogen metabolism, is involved in the activation of numerous enzyme systems within plants, is essential for the assimilation of carbon dioxide in photosynthesis, and functions in the formation of riboflavin, ascorbic acid, and carotene in plants. Typical annual requirements of manganese by the plant are 0.5 to 1 pound per acre depending upon crop and yield.

Guaranteed Analysis

Total Nitrogen (N).....	4.00%
4.00% Ammoniacal Nitrogen	
Soluble Potash (K ₂ O).....	5.00%
Manganese (Mn).....	6.00%
6.00% Chelated Manganese	
DERIVED FROM: Ammonium Hydroxide, Potassium Hydroxide, and Manganese EDTA.	

FIRST AID

SKIN: Wash with soap and water for 10-15 minutes . If irritation persist, get medical attention.

EYES: Flush with cool water for at least 15 minutes. Remove contact lenses if present and easy to do; continue rinsing. If irritation persist, get medical attention.

INGESTION: Drink large amounts of water. **DO NOT INDUCE VOMITING.** Get medical attention immediately or call a Poison Control Center. Do not give anything by mouth to an unconscious person.

INHALATION: Get person to fresh air. If unconscious get medical attention.

When contacting a physician, have SDS and product label available.

For Chemical Emergency: Call the POISON CONTROL CENTER at 800-222-1222

APPLICATION RATES

TREE FRUIT AND NUT CROPS

Foliar Pre-Bloom: Apply 1½ quarts per acre per 100 gallons of water by ground application and 1½ quarts per acre with sufficient water for thorough coverage by air.

Foliar Post-Bloom: Apply 1 quart per acre per 100 gallons of water by ground application and 1 quart per acre with sufficient water for thorough coverage by air.

Foliar Post-Harvest: Apply up to 2 quarts per acre per 100 gallons of water by ground application and up to 1 gallon per acre with sufficient water for thorough coverage by air.

Soil: Apply 1-3 gallons per acre with pesticides, fertilizer or irrigation water.

ROW, FIELD AND VEGETABLE CROPS

Foliar: Apply up to 1 quart per acre with existing spray program soon after emergence. Continue applications as required.

Soil: Apply 1-6 quarts per acre with pesticides, fertilizer or irrigation water

CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
