

Ignis

Methylated Seed Oil

KEEP OUT OF REACH OF CHILDREN

WARNING

Harmful if swallowed.

PRECAUTIONARY STATEMENTS

Wash hands, forearms and face thoroughly after handling. Do not eat, drink or smoke when using this product. If swallowed: Call a POISON CENTER/doctor if you feel unwell. Rinse mouth. Dispose of contents/container to a licensed hazardous waste facility in accordance with state and local agencies.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal of this product.

Storage: Store at ambient temperature. Store in a closed container. Store in a well-ventilated place. Keep cool. Keep container tightly closed and DO NOT allow water to be introduced to contents of this container. DO NOT reuse this container.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Triple pressure rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit www.acrcycle.org. Dispose of contents/containers in accordance with local/national regulations.

ENVIRONMENTAL HAZARDS

Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters.

FIRST AID

SKIN: Wash with soap and water for 10-15 minutes. If irritation persists, get medical attention.

EYES: Flush with cool water for at least 15 minutes. Remove contact lenses if present and easy to do; continue rinsing. If irritation persists, get medical attention.

INGESTION: Drink large amounts of water. DO NOT INDUCE VOMITING. Get medical attention immediately or call a Poison Control Center. Do not give anything by mouth to an unconscious person.

INHALATION: Get person to fresh air. If unconscious get medical attention.

When contacting a physician, have SDS and product label available. For Chemical Emergency: Call the POISON CONTROL CENTER at 800-222-1222

PRINCIPAL FUNCTIONING AGENTS

Methylated seed oil.....	100.0%
Total.....	100.0%

All ingredients are exempt from the requirements of a tolerance as specified in 40 CFR 180.

GENERAL INFORMATION

IGNIS is a unique blend of highly refined and modified spray oil and superior nonionic surfactants. IGNIS's chemistry allows for superior wetting and absorption of those pesticides or products which labels recommend the addition of a spray adjuvant to improve coverage. The addition of IGNIS to a spray tank solution will improve a spray application by physically modifying the deposition and wetting characteristics of the spray solution, the result being a more uniform spray deposit.

The use of IGNIS can increase pesticidal activity where the following factors occur, but is not limited to: 1) When used in areas of the country with low relative humidity and high temperatures, 2) When target species are larger than label recommendations at time of application.

MIXING INSTRUCTIONS

Prior to pesticide application, clean mixing and application equipment according to pesticide label directions. To minimize foaming, fill spray tank 2/3 full of water. If foaming is anticipated, an antifoaming agent should be added before pesticides, nutrients, or IGNIS, unless pesticide label instructs otherwise. Add pesticides and/or fertilizers as directed by label or in the following sequence: 1) Micronutrients and fertilizers, 2) Dry flowables and dispersible granules, 3) Flowables, 4) Water soluble pesticides, 5) Emulsifiable concentrates. Continue agitation and add IGNIS. After the addition of IGNIS, reduce agitation and allow to mix for 1 to 2 minutes. Continue filling tank while under minimal agitation. NOTE: For optimum results, spray mixes containing IGNIS should be applied within 36 hours.

DIRECTIONS FOR USE

This herbicide label will recommend the use of a modified vegetable oil and provide specific use rates, mixing and application instructions, and any additional precautionary statements. Typical use rates for IGNIS are 1.5 to 2.0 pints/acre. The 2.0 pints/acre rate may be required if weed populations are extreme or if plants are stressed at the time of treatment, unless pesticide label instructs otherwise. Always add IGNIS last to the spray mixture after herbicides have been added and agitated. Higher rates may be required on hard to control weeds or weeds which are under stress.

NOTE

The application rates on this label are based on pesticide labels which recommend the use of a methylated seed oil or nonionic surfactant. Use the rate recommended on the pesticide label. A compatibility test is recommended prior to use. Always read and follow all label directions of the herbicide being applied.

CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
